Civilisation is backwards, Primitive societies are advanced!

When we say we want green anarchy, a stateless society, free and in harmony with Nature, people tell us that it's 'a nice dream but it'll never happen' as 'it's against human nature'. The point is that it has happened green anarchy was how all people lived for a good 90% of history, how they lived before they were even homo sapiens, how some still live better than we do today. When we point this out, people start pissing and whining about 'going back to the caves' and getting protective about their TVs, cars and other fruits of 'Progress', particularly Lefties and 'anarchists' who don't know the difference and who think 'Progress' is some inevitable law of Nature and not part and parcel of State society and the self-serving elites ruling it. We'll demolish those myths in a future issue -- in this, we're looking at why people living in green anarchy are more advanced than in this sort of society.

Defining Anarcho-Primitivism With John Moore

At the opening of Against His-story, Against Leviathan!, perhaps the In Gone Primitive: Savage Intellects, linkage of the primitive with origins seems premier anarcho-primitivist text, Fredy Perlman remarks: 'This is the place Modern Lives, a survey of twentieth a logical one in the West, as Torgovnick to jump, the place to dance! This is the wilderness! Was there ever any century Western appropriations of the explains: 'For "going home," like "going other?' (p.1). This seemingly innocuous point encapsulates a key aspect of primitive, Marianna Torgovnick writes: primitive," is inescapably a metaphor for anarcho-primitivism: the sense that the primitive is here and now, rather 'The metaphor of finding a home or being civilization, the idea of going home, going than far away and long ago. Perlman suggests that his notion is 'the big at home recurs over and over as a primitive seems appealing. This notion of a public secret' in civilization: 'It remains a secret. It is publicly known but structuring pattern within Western journey back to the primitive as a passage not avowed. Publicly the wilderness is elsewhere, barbarism is abroad, primitivism. Going primitive is trying to back to origins is echoed in the title of the savagery is on the face of the other' (p.1). But Perlman knows better than "go home" to a place that feels comfortable recent volume edited by Ron Sakolsky and this and, perhaps as a result of his insight, so do we. And this knowledge is and balanced, where full acceptance comes James Koehnline: Gone to Croatan: crucial. For in asserting the presence of the primitive, even in the midst of primitive's hominess takes its attention of North American Dropout the megamachine, Perlman is marking the difference between anarcho- salves our estrangement from ourselves and explains, "The first "drop-outs" from primitivism and other forms of primitivism in the West. And, furthermore, our culture' (p.185). he is reclaiming a primitive identity for those trapped inside Leviathan. Superficially, this seems an attractive idea This is a critical activity.

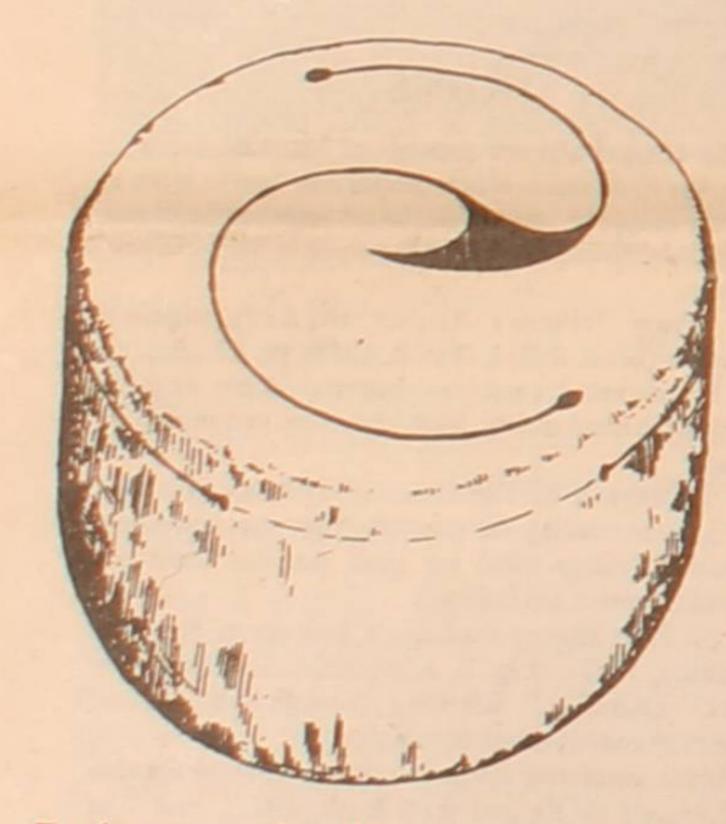

and one conducive to anarcho-primitivism.

English colonization in North America left the "Lost Colony" of Roanoke and went to join the natives at Croatan' (p.1). This aligning themselves with notions of the find the path back to 'our' lost origins. In whatever form they take. primitive that are endemic in the West -- the process, of course, 'their' specificity is notions that are used to underpin racism lost, merely becoming either an image of and imperialism.

The idea the West can discover its origins

through a journey into the primitive contains a number of reactionary connotations. For example, one notion underlying such a belief is that primitives inhabit a world that is timeless and unchanging. Perlman has correctly identified history as His-story, the story of dominance and control that is the narrative of history. Clearly, lacking Leviathanic structures, primitives do not inhabit this kind of chronology. But on the other hand the notion that primitives live in a timeless "origin" requires radical measures,' vision', the Fifth Estate circle indicate: vacuum, a perpetual state of Torgovnick indicates (p.186). And it is changelessness, denies them the ability to these radical measures that anarchodevelop. And this notion has historically primitivism is prepared to make. Indeed, been used to characterize primitives as the readiness to take these measures eternally backward and hence in need of constitutes one -- but only one -- of the Western intervention to progress. So many features which distinguish anarchonotions of the primitive as timeless have primitivism from other forms of Western been and are used as a justification for primitivism. imperialism and the eradication of the prioritization of affirming the primitive as

Moreover, another implication of this conception of the primitive is that history is linear and that no other ways of individual. But whereas reactionary conceptualizing or experiencing time are legitimate. And thus the whole ideology of progress is also latent within conceptualizations of the primitive as source and origin.

primitive as origin, and the resulting desire to journey 'back' to the primitive, is and sense of possibility, rather than some based on an idyllic image of the primitive as a site characterized by simplicity and freedom from troubling differences. In this sense too, anarcho-primitivism Torgovnick states this well when she notes:

The primitive's magical ability to dissolve differences depends on an illusion of time and sense in which the primitive is both etemally past and eternally present. For the charm to work, the primitive must represent a common past-our past, a Euro-American past so long gone that we can find no traces of it in Western spaces. But the primitive must be etemally present in other spaces-the spaces of primitive peoples. Otherwise we cannot get to it, cannot find the magical spot where differences dissolve and harmony and rest prevail. The illusion depends on denying primitive societies "pasts" of their own, their own original states and development (perhaps wholly different from ours) ... If we imagine primitive societies as occupying linear time with us, but as developing in ways of their own to their present state, then they could not be our origin; there would be no time and place for us to "go home" to. (p.187)

And in this essential. One without the other remains write to someone with an abbreviated schema, the primitive is always other, disastrous. For anarcho-primitivism does listing, you should write to them c/o the Primitivist Network, PO Box 252, always 'them'. The primitive must always not seek to replicate primitive lifeways. It Network PO Box. Once contact has been be long ago or far away, not right here and reappraises the primitive and seeks to draw made, of course, the decision what to do

the idyll that 'we' have tragically lost or of the horrible savagery 'we' have thankfully overcome. Such primitivism is all about 'us' and serves to efface the primitive in ways that are quite compatible with civilization's eradication of primitive peoples and lifeways. So the notion of the primitive as origin and source needs to be rejected by a primitivism that aims for a radical departure from the Western

part of the here and now. For Perlman, as for other, mainstream primitivists, civilization is just a veneer that is thinly spread over the surface of the civilized primitivists regard the primitive as characterized by savagery, Perlman sees it Reconnecting the roots of anarchy and its as characterized by abundance and present expression, always from a possession -- and not least by the perspective sensitive to issues of power, possession of a rich inner life and sense of remains at the heart of the anarchobeing. So for him, the primitive, in primitivist project. For, in attempting a civilized conditions, is always a potential, a provisional definition of anarchopotential whose bursting out is always a primitivism, it is always necessary to promise of joy and freedom. The primitive, contrast it with what it is not, and in in such a context, is encased -- bound and particular against the backdrop of other shackled -- but always capable of breaking forms of Western primitivism. Something that is rediscovered, rather than discovered. This is an insight that Ursula Le Guin comes to in an essentially anarcho-primitivist fiction which she entitles, not 'going primitive' or 'going home', but Always Coming Home. Rather, our investigation into pre-civilized modes combats the notion that humans have always lived with alarm clocks and factories. It assails the prevalent amnesia which the species exhibits as to its origins and the varieties of social association which existed for tens of thousands of years before the rise of the state. It announces that work has not always been the touchstone of human existence and that cities and factories did not always blight the terrain. It asserts that there was a time when people lived in harmony with each other and with their natural surroundings, both of which they knew elements, discussion about the future sensibly should be predicated on what we desire socially and from that determine what technology is possible. Anarcho-primitivism is a label and an inadequate label at that. It is more easily described than appropriately named. It includes a refusal of ideology and the racket of politics with all its power-seeking strategies. It is a process, a process of renewal and recovery. It is a mode of thought and action, a world-view, a mode of being in the sense that Hakim Bey has defined ontological anarchy. It is a refusal to go primitive, but an affirmation of the need to become primitive again.

The Story of the Swedish ALF, Djurens Befrielse Front

After being interested in animal welfare almost all my life, being as member in ordinary animal welfare associations, the turning point came in the autumn of 1984. Swedish TV broadcast a film about all the horrible and cruel things done to animals. Things that I already knew of and a lot of things I didn't. While watching Victor Schonfelt's film hatred began to grow inside me. The film showed things worse than slavery, worse than the extermination camp in Nazi Germany. I had always avoided watching such terrible pictures. But this time I forced myself to see every single frame.

The dogs had been given soft food and of had to do something -- really do A steel door with a complicated lock. No course had no bedding and toys in order to something, to take action. But how? I had never felt so lonely as I did that night, as if I was the only human being in the whole

Of course I had heard of the Animal small office and on the desk was some sort taken care of and moved a long way from Liberation Front and always had felt of a pot with keys in it. Back to the steel Malmo, we wrote a press release sympathetic to their work. Could I do that? Not me, a middle class, divorced, then-35 year old woman. Spending days thinking about this, the answer came up. The only way to get the abused animals saved was to just go in and bring them out. But that's a crime. So what! The bigger crime is to expose animals to abuse.

As I couldn't do anything on my own I had to find people to work with me. I couldn't put in an ad, could I? Well I did, under Personals in the newspaper, seeking people interested in animal welfare work the English way. Then I spent a couple of nervous days and then answers kept dropping in. Thirteen answers. After two meetings talking around things, saying what I wanted without actually saying a small group of four was left after the rest found it too radical. There were 'Asa', 'Kevin', 'Eric' and me. Discussions took place about how to do it and most of all where. We didn't know that much about vivisection and how to break in. How to use a crowbar? What name should we use?

Well, that question was easy of course, we should take on the name Animal Liberation took place and also some field-trips. We alarm. Finally the fourth key fitted. have heard rumours that the university of hear the dogs bark on the top floor.

year. Guinea pigs and more dogs. We were beginning to get rather good at this and the second action that year was a real cheeky one. We knew that a breeder for vivisection outside Malmo transported guinea pigs by train from Malmo to Stockholm in the evening. We walked into the crowded large train station in plain clothes looking very normal. The station had police and security guards. We ran fast towards the train's goods wagon which was unlocked, after we had placed a couple of look-outs. We found the guinea pigs easily and took the card boxes in our arms walking away. When we were close to the entrance door, a pair of policemen walked by us. They seemed to find everything

Away we went with 39 lovely white guinea pigs. Our rescue wasn't noticed until the next morning in Stockholm, when the lab went crazy. No guinea pigs to torture! Now we were really in the mood. We had for some time had our eyes on the university in Lund where almost every department has vivisection labs. We went on a field trip to the department of Pharmacology. It looked as if it was possible to carry out action #10 there. On 27th September 1987, we went in at midnight. While the look-outs were on a roof, the troops went in. The look-outs spotted a security guard walking towards the door we had just broken in through. We got the signal for danger. Inside the rabbit room, none of the activists breathed for a long while. Security guards aren't the brightest people, this one just closed the door and that was that.

The eight rabbits were carefully put into special bags and were brought out.

Several rescues at the university took place and also some sheep and privately owned dogs were rescued from their abusers

GOING PUBLIC

In 1987 a terrible thing happened. Someone (and I know who) told the police about me. Up to now the police didn't have about this, without knowing anything. a clue where I was or who I was. Early one morning a police car came up to the house where I lived. I knew at once what was experimenting on animals. We went to the in the vivisection department. For some time now we had both a phone number and a post office box and some money started to come in and letters, letters and more letters, journalists, TV and radio. The whole thing was like a mad house. By now we also had established contact with colleagues in UK.

THE FIRST SABOTAGE

Action #34 on 21st April 1990 was an unusual one. We gathered a lot of nonconnected people for a demo outside the place in Orkelljunga where we had rescued dogs from. The owners knew we were coming and had prepared themselves with thugs who more or less beat us up while the place was crowded with police who I also had a chance to take part in a demo looked the other way. We weren't really badly hurt but I'll never forget the disgusting feeling when vivisectiondefenders/animal abusers touched me with their violent hands. When I came home that same day, I sat down and had a good long cry. But there wasn't time for feeling sorry for oneself. A few days later some more hunting platforms became history and four dogs were rescued from a notorious dog breeder. On 14th May 1991 we visited four fur shops in Helsingborg with red paint, glue and so on. This, our action #39. The last day of my visit was the big march was in honour of the young hunt sab Mike against vivisection arranged by NAVS. "AIDS" as a genocidal attack on countercultures and the underclass

"AIDS" is not a disease but a weapon used by the state and huge multinational corporations to attack gays, drug users, blacks and the poor. The attack is in the form of a toxic onslaught by the drug AZT but it more clever than that; in the guise of science people are conned into believing that they have this disease. Primary control over your own body is taken away from you - you are going to die and all you can do is take this drug produced by one of the world's most profitable companies. Gradually your health ebbs away and you die. Every one is very sad and gives loads more money to "AIDS" research (vivisecting chimps etc.) hoping that Science can find the solution. In reality it is Science that has invented the disease.

It is useful for capitalism because it ignores the environmental and psychological devastation caused by our sick society - bodies go wrong because germs get into them, not because you feel ill or because there are so many toxic chemicals and drugs floating around. The HIV-AIDS hypothesis is just one of the more extreme examples of this approach. It fitted in and was backed up by millions of pounds of drug company money and an evangelical furore.

The Cartesian clockwork approach necessitates animal research: animals are seen as other little machines that you can play around with. Monkeys and chimpanzees are the favourite for "AIDS" researchers, who love to try to make their victims get "AIDS" by injecting them with vast quantities of the virus. The HIV-AIDS hypothesis will never be either proved or disproved by this horrific torture. All that toxic. It is carcinogenic; it causes cells to undertaken because it threatens the HIV- Finally, the HIV-AIDS hypothesis allowed happens is that sick men in white coats the state and the medical-industrial giants gather more and more meanlingless data to bring to heal a section of US and UK about a virus that has no relevance to counterculture. Now, while the reaction of some readers suggest this is not an appropriate reaction. The fact is political conflict in Leeds that has occurred, is continuing, and may well escalate is being driven and to some extent involving MI5, Special Branch and Searchlight too. In that respect, it is worth reproducing another comment from the aforementioned fascist that

The person isn't named but it would seem probable that he is speaking of the very BNP organiser who is the author of White Lies and White Boar too.

Other sources on the far right have seen White Lies as putting certain people, such as the Mark I Combat 18 leadership, very much in the frame by naming them and helping MI5 by making the local police especially look very stupid indeed.

Perhaps, but by drawing attention to the case of White and the Northern Star address book theft in particular, it could be argued that White Lies has opened up for examination various MI5 agendas that they do not want discussed, I believe, and which sadly so far haven't been, despite my own efforts which will continue.

MORE RESEARCHERS NEEDED: APPLY YOURSELF

It is just not good enough for supposed 'investigative journalists' and 'parapolitical experts' to dismiss the issues raised about Leeds and other aspects of my work by reaching for such tired clichés as 'it's very complicated', 'it's poorly written', 'it's not sub-edited properly'. The world is very complicated: witness Iran-Contra, Lockerbie or the career of Brian Nelson -and to reject vital truths because their mode of expression may be convoluted is unpardonable.

As too is what by his own account one Leftist 'journalist' did recently. That is, having read the most recent abuse of myself in the comic (March's Searchlight) he phoned up Leeds AFA and, without having even looked at what I wrote concerning Leeds, asked them if there was any truth in having been calling for nearly two years for months after I had already done so in print, up by a 'trusted local journalist' at face their evidence to the Commons Home nothing anyway. value, and thus declined to investigate. So, in the week between 9th March and them going to print, Searchlight expect their readers to believe they suddenly 'discovered' something that I have been speculating on for two years in the public domain, that certain C18 activities intersect with MI5 agendas, we truly are on 'Fantasy Island'. However, consistency aside, there is a crucial difference between my and their account of what is going on now, and has been since C18's formation. It has never been my contention that Combat 18 was set up by MI5, rather I have sought to draw a distinction between the original neo-nazi elements and those who have sought to move in on their patch and take over. The first person analysed who fits into that category is the 'ghost at the banquet' of contemporary fascism, Tim Hepple, whose career I have analysed in such acute detail that Searchlight have never even dared refer to my second publication on him At War With The Truth eighteen months after it came out.

The second person publicly analysed so far whose actions seem to fit into the category of state escalation of political violence is Tony White, particularly for the one act of 'stealing' and passing on the Northern Star address book. Now, the written evidence seems to tie White to the local Special Branch and AFA, and by clear extension Searchlight, but not as such MI5. That written evidence is not all I have seen, nor all there is to go on, and White has not thus far come clean on the Northern Star address book, even assuming he is a 'reliable witness'. And in any case, given Searchlight's baleful influence over the Leeds AFA leadership and track-record of part-running MI5 agents (like Hepple), it would make good sense for MI5, especially it! He took their leadership's denial, backed MI5 to 'investigate' C18 (most notably in will impress nobody but those who know given White's low-level and very expendable status, to have 'run him' using such intermediaries. Already, in the April instance, as long ago as April 1993 in A issue, there is a reference to the "systematic theft of material that was used to draw up influence C18 and in an appendix to At hit lists of hundreds of potential victims" (p.2); which it is implied however, was predicted in advance of it being made carried out by C18 autonomously, not my public exactly what Searchlight's evidence belief in the case of Leeds and White.

So all his stuff about issue going to print would have been Searchlight's 'reputation as legitimate Robson's reportback of that meeting and experts' cuts no ice with me. the imminent publication of the White Lies I do not accept the Red Action Thus the relevant criticism of Searchlight pamphlet. It is these two things together, characterisation of the White Wolves as isn't just that they haven't informed the and particularly the imminence of the merely another name for C18 and citing Anti-Nazi League about their names / pamphlet, from which apparently (and I Searchlight (January 1995) as evidence addresses appearing in fascist publications believe actually) even more was held back hardly impresses. I regard that document (Red Action 71, pp. 2-3), it is that

RED ACTION ENTER THE FRAY

In their May issue of Red Action (pp. 1-3), prominently in the Yorkshire area. The undoubtedly the strongest 'physical-force' White Wolves document urges fascists to component within Anti-Fascist Action have target (p. 5) laid into Searchlight, and not before time. They quite rightly flay Searchlight for their April announcement that MI5 supposedly set up C18, commenting that given Searchlight have been continually calling for MI5 to take over 'monitoring' fascists

either they were promoting MI5 in complete ignorance of the C18 connection or they were promoting C18 in blissful ignorance of its MI5

In drawing attention, through case studies, to Searchlight's lucrative relationship with the media at the expense of anti-fascists, Red Action have added significantly to the literature already available exposing Searchlight's true role. They quite rightly point to Searchlight's aim of commanding "a monopoly of intelligence on the farright", as a result of which "individuals or organisations deemed to be rivals are ruthlessly denounced" (p. 2 -- don't I know it!). The article, all the more authoritative because the organisation it comes from have earned the right to be taken seriously, CONCLUSION -- QUESTIONS finishes by calling upon anti-fascists to give THAT NEED ANSWERING 'intelligence' to AFA directly, not Searchlight, and states that for Searchlight "there can be no way back. One way or another, their number is surely up" (p.3). Hopefully this critique of Searchlight will have great consequences for the 'team' though not, I fear, immediately politically fatal ones.

I could leave it at that but there are a number of issues raised (and not raised) by the Red Action article. The first thing is the statement by RA that if (p.1)

Searchlight was unaware of the master / servant relationship existing between MI5 and SB then their reputation as legitimate experts on the far-right is in tatters

Quite frankly, it is in tatters already, irrespective of such an 'awareness'. I would suggest readers lay end to end my articles in Lobster, New Socialist, Tribune, Return and the relevant pages of Turning Up The Heat and actually compare them with what Searchlight 'trade' information and slant Searchlight have said on the same subjects stories to fit state agendas, they actually (or not said) to see how much of a have taken a part in running agents at arms 'reputation' Searchlight deserve to have. length and therefore for the secret state Further analysis of the way Searchlight plausibly deniable. myself or even allow me to put my name to refer to At War With The Truth, never mind dextrous with wordplay is accompanied by

Lie Too Far I speculated on MI5 seeking to War With The Truth of October 1993 I to the Home Affairs Select Committee had As I see it, the two events that caused a said. As mentioned above, it was m who

> not necessarily the politicians or media who have waged the undeclared war ... The public .. would merely sit on the fence while we fought and lost a war of attrition with the state. Instead our main line of attack must be on the immigrants themselves, the Black & Asian ghettos. If this is done regularly effectively and brutally, the aliens will respond by attacking Whites at random, forcing them off the fence and into self defence. This will begin the spiral of violence which will force the Establishment's hand on the race issue

Now, while the killing of Richard Everitt in Camden could, quite rightly, be seen by Red Action as consistent with this strategy, the vast bulk of C18 activity cannot. For instance, both Redwatch and the two Combat 18 magazines have targeted Leftists, radical bookshops, anti-fascists and Jews especially, something that has been borne out by attacks on the ground. I am also not aware of any murders being claimed by either C18 or the White Wolves, although I will accept correction on that point if evidence is forthcoming.

The most substantial point I want to make in the debate that the Red Action article has encouraged is that my critique of the Searchlight team is not just based around the question of information: its withholding, selective dissemination, peddling of disinformation and so on. All these Searchlight does, but they also do and have done for a long time far more.

What I am referring to is the fact that,

probably starting with Dave Roberts in Th. 1970s, Sonia Hochfelder (Gable's wife) and Ray Hill, to name but a few, Searchlight 'agents' have also very likely simultaneously been state operatives too, actually taking part in operations that suited the interests of the secret state. This is aside from the likes of Gable and Atkinson who openly boast of collaboration with MI5/Special Branch. It isn't just that

I was witness to the early events in the life of C18 and I reported back to Searchlight. My and other information led the Searchlight team to set in motion a thorough investigation into every aspect of C1811

While the bourgeois media perhaps has the 'excuse' of the D-Notice system to explain non-coverage of Hepple, the same cannot be said for the Left. This is paralleled in significance by the career of Tony White; it implicates Searchlight and their associates in Leeds in yet another MI5/SB operation. before him Hepple may well have been, and probably were, involved in the transfer of such information to the fascists, both directly and indirectly.

On this reckoning, Searchlight aren't just a 'dodgy' magazine interested in a fast buck, 6. A Lie Too Far (Mina, April 1993), pp. understandably doesn't; just why it is that 30-32/37, At War With The Truth (Mina, Searchlight have recently, and uniquely, November 1993), pp. 25-26, Turning Up criticised MI5. Given that, without naming The Heat (Phoenix 1994) pp. 65-83. it, Red Action have in their possession a 10. Tape recording, as 8.

Searchlight's abrupt change of line in moving onto my analytical terrain causes more people other than the few anarchists who have so far taken an interest to actually examine the serious issues raised by my previous work -- rather than dismiss it as rubbish -- then I'll be glad indeed.

ENCOUNTERS WITH THE INSIGNIFICANT

'Apostle of Violence' bottled it

On sunny day in late May, I was browsing in a Leftist bookshop when my attention was suddenly caught by a rather insistent but insignificant-looking individual. This person perched himself near to me and began shouting incoherently that I was a "shit, a fucking shit, a fucking shit". Intrigued as to who the possessor of such a large vocabulary might be, I looked closely at this person and found out it was in fact the sometime-Independent columnist Stewart Home, author of novels extolling violence. The shop's proprietors understandably didn't want a heated discussion to ensue on their premises (it would have driven away the hordes of customers queuing outside) so I had barely time to establish that this Home creature apparently believes I am the editor of Green Anarchist, and is upset that his (presumably good friends) John Harlow (Sunday Times) and David Rose (Observer) have been criticised by myself. It is always pleasing to see such defence of the oppressed and voiceless and I fully intended to inform Mr Home in detail of my full support for his brave stand.

Obviously being names, therefore I will sign my own.

This however is where matters got being fleet of foot too. Strangely, our interesting. I waited outside the shop for a novelist hero seemed not to hear my full twenty minutes and for some reason he entreaties to engage in earnest discussion didn't seem to want to come out. Indeed, he with him, and when I took a short-cut to seemed to develop an urgent desire to see the local station he had disappeared from exactly what literature was contained in the the face of the Earth; perhaps reading all shop's basement, a desire that seemed to those Rosicrucian manuscripts has done

As Jean Paul Sartre's preface makes clear, the SPK's analysis goes well beyond conventional anti-psychiatry as it situates it in a revolutionary context. For all the verbiage, I can see no reason why anarchists should not give this analysis close consideration as the SPK certainly appear anti-heirarchical both in theory and practice and address many issues imporant to revolution on the periphery.

MY AUNT EDITH BY PHOEBE HESKETH. LANCASHIRE COUNTY BOOKS, 187 pps.

Just one of those chance finds under 'local history' in the public library, this is an inspiring book about a seven times jailed suffragette who burned down Lord Leverhulme's summer house and planted a bomb in the Liverpool Cotton Exchange.

Phoebe Hesketh is a poet and her aunt Edith was Edith Rigby from Preston ("Coketown" in Dickens' Hard Times), a 19th century "Hell hole where capitalist fortunes were made".

Edith Rigby was eccentric, a nonconformist who shocked people by riding the first woman's bicycle in Preston and went climbing in the Lake District, conspiring to catch a gluimpse of Ruskin at Coniston. She started her political life by trying to improve working conditions for factory girls. Then she began a club, teaching needlework, with games and singing, but serious stuff like Shakespeare and the first production of Ibsen in Preston proved less popular.

caught out when she offered to translate a business letter from France. When Charles turned up she told him "I'm sorry sir, we're not allowed followers".

Manchester-based suffragette movement, the WSPU (Women's Social and Political slow and inevitable collapse of capitalism Unin) and in at the start of the Independent Labour Party (ILP). At this stage, 1903 onwards, forty years after Milicent Fawcett's peaceful women's scenario. There is a large section on suffrage committee had been set up in Manchester, the movement had made "ass much impression upon te rigid minds of politicians as a feather brushed against rocks". The militant Pankhursts, a weaver from Oldham called Anne Kenney and people like Edith were out to change all that. In February 1904, they broke out a banner at the Liberal rally in Manchester abnd heckled the speakers. Politicians ignored their questions, stewards threw them out. The pattern was set.

> After this there were attempts to storm Parliament. Edith Rigby was one of the 57 "ringleaders" arrested in 1907 and jailed. She was vilified in the Preston papers, spat on in the streets. Later, in another attack on Parliament, Edith hid inside a 'Trojan house' delivery van. During this raid a small woman from Yorkshire was almost killed in the ruck with police.

'Mr Double Face' posters). Edith and the others catapulted windows, cut telegraph wires and tried to storm through the cordon but were arrested. An antisuffragette riot and shop looting followed.

In 1910 the census was attacked. "We count for nothing so why be counted?" Because the Labour Party was lukewarm, Edith was expelled after she threw stale black puddings at J H Thomas, an MP. Her assistant, Beth, padlocked rthem inside their smoke-filled committee room. With the defeat of the womens franchise bill, militancy moved up a notch or three and a wave of direct action against buildings, art galleries and public places started. Quakerish pleas for patience were pushed aside. "What good'll patience do? Men got the vote by force. Ireland is getting Home Rule by violence. Fifty years of patience have got us nowhere!" In this new wave of militancy, Edith helped organise the tarring of the Lord Derby statue. The Mayor and the whole council were summonsed from their beds to see Forget about necrotising fascitis, the flesh burn down Lord Leverhulme's bungalow at Rivington.

The fire was her most effective action. It was observed by Lloyd George and the Prince of Wales. Locals thought it was "better than bonfire night". Only a few stone pillars were left. Edith's associates set fire to Blackburn Rovers grandstand, exploded a cannon in the park and poured acid on the golf course. Edith herself was again caught when she bombed the Liverpool Cotton Exchange. Released under the Cat & Mouse hunger strike rule, her health suffered due to forced feeding. Edith went to hide in Ireland, while the Pankhursts fled to France.

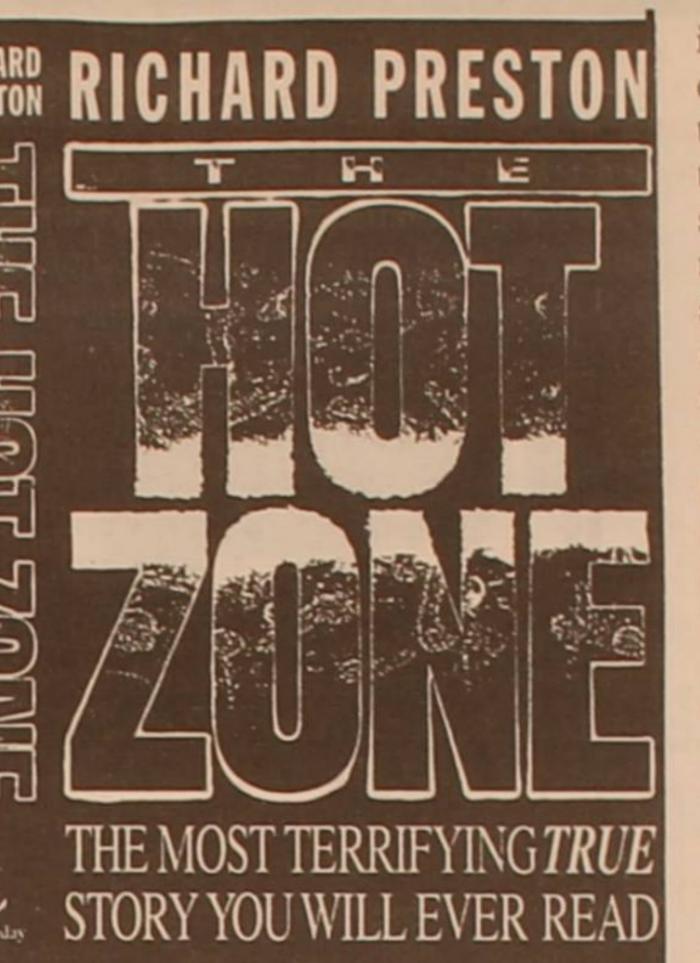

For the suffragettes, 1913-14 was their peak. Then with the war, the Pankhursts closed diown the WSPU and suopported jumping off a sinking ship. the government. The movement was split. In 1918, eight million women over 30 were given the vote. Insurance companies were having to pay out £40,000 a week in 1914 and did not want to carry on footing the bill.

ZAPATISTAS IN THEIR OWN WORDS. £1 FROM DS4A. BOX 8, 82 COLSTON STREET, BRISTOL BS1

With an introduction on who the EZLN are and what they've done, there's an editorial from the Ecologist magazine, a very informative interview with Subcommander Marcos taken from the August '95 Love & Rage (reprinted is the excellent Blast #2 magazine), a Declaration of Demands of the present EZLN and Manifesto of the original

Zapata. If you wish to know about the present Zapatista struggle, this is excellent reading, stripping away any myths that they are some kind of Marxist, Maoist, or Trot-inspired group with their views on sexual liberation and other struggles in Central America. A most worthwhile read and definitely recommended.

cooing over their 'artistic' lines, one of the pronouncements where they stand on the The story of the struggle to keep a hospital open despite the efforts of the government, the Area Health Authority, management, University College London and the Wellcome Foundation and Trust.

This is an account of all the strikes and 1992-94, from a person who I guess was there, with news clippingd and leaflets for their sort but not the plebs? That said, the attention -- most importantly the from the time. It was rather interesting to read accounts of the opportunism of the SWP who tried to run things to the detriment of the striker and occupiers. There are swipes at UNISON and the TUC too, generally showing them for the sick, two-faced bastards they are. The reflections at the end of the pamphlet paint a glowing future.

This is a bit workerist but it is interesting.

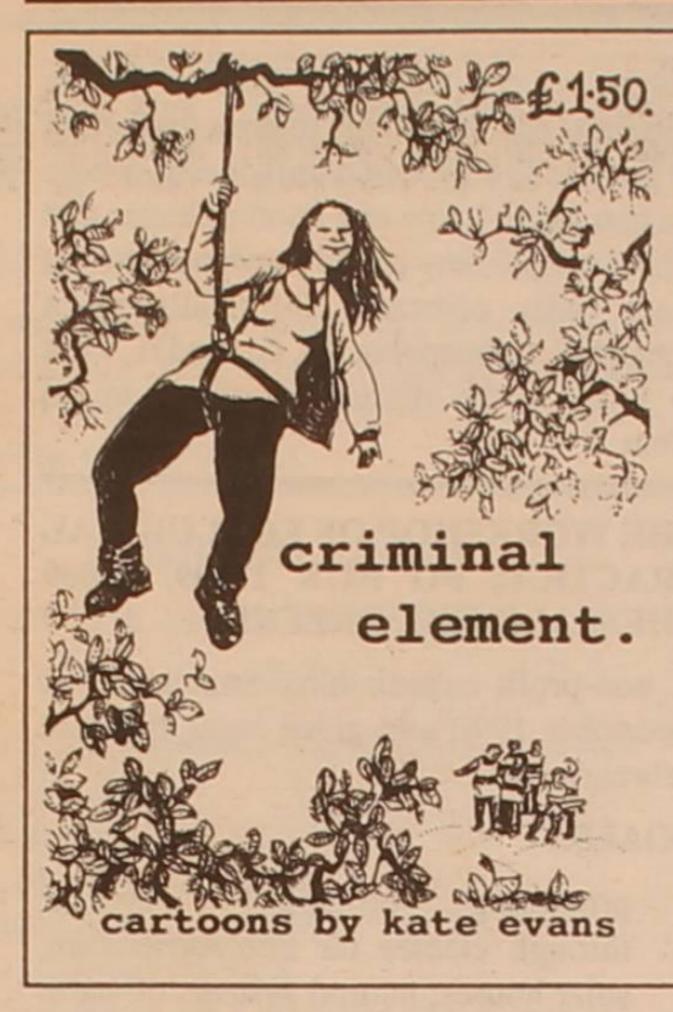

DEFENDING YOUR FREEDOM BY RESEARCH CAMPAIGN SERVICES, £5.

The old bill have got our review copy so unfortunately we can't let you know where to get it from.

Legal Research & Campaign Services are Gren-rooted group that previously produced a legal guide to the poll tax in 1990 or so. Although this pamphlet is intended as a guide to Part V of the Criminal Justice Act for the general reader, we found it seriously hard going taking in all its contents at one sitting, so steadily does it, eh?

We ran across one we hadn't heard about though -- causing alarm and distress ('Jeremy Beadle to be arrested') so all those folk thinking about rolling up on the doorstep of their local live exporter or even going in for a bit of armchair activism should bear this one in mind.

We thought some of the defences being seriously advanced in this guide -- calling for maps to be drawn in the case of dis/proving trespasses and pleading drunkeness against said trespasses being aggreivated sounded a bit thin to us. Still, early days yet -- the ball's hardly started rolling on CJA case law yet...

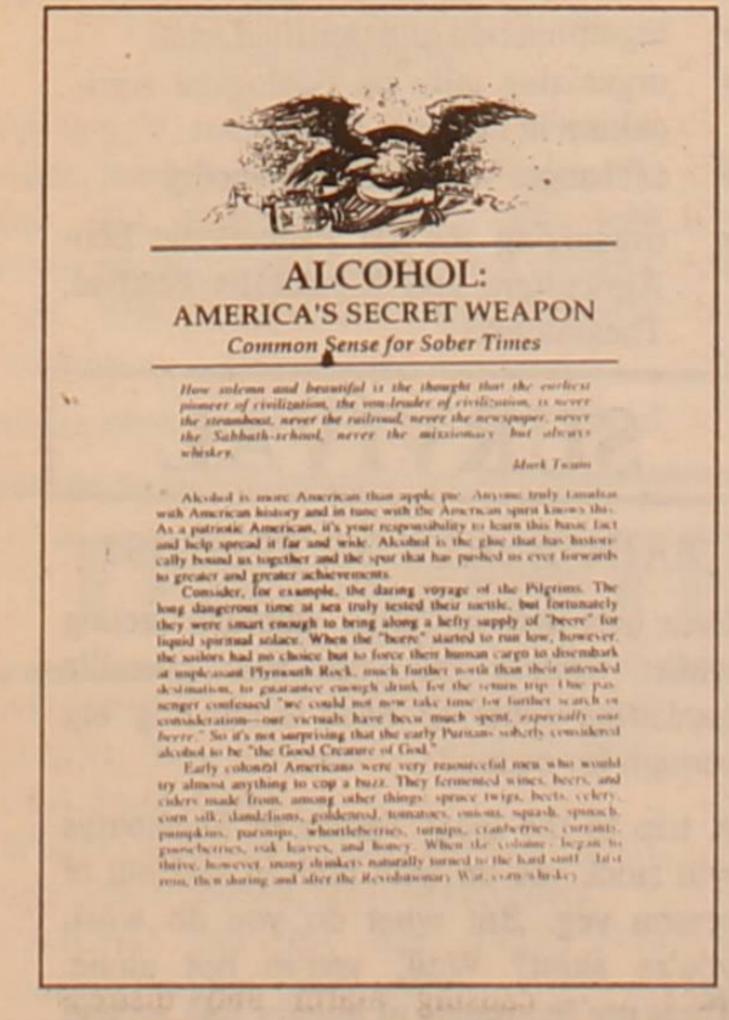

CRIMINAL ELEMENT BY KATE EVANS. £1.50 FROM JUSTICE?, PO BOX 2600, BRIGHTON, EAST SUSSEX.

This short collection of cartoons is a benefit for Justice?, the Brighton-based anti-Criminal Justice Act group.

Although some of the background to the toons will be familiar to anti-roads campaigners (eg. the Claremont Road strip, Sparkly Boots), the prominence of Greenham in it won't be. Lest you think this is the province of a previous generation of peaceniks, the author assures us she spent a summer there on and off aged 11 and it evidently made a profound impression on her.

That said, we found the New Spirituality and Tactical Support Group strips made the biggest impression, particularly the former as it did demonstrae how arid Yo all you prisoner supporters out there!

Not wishing to take a sledgehammer to crack a nut -- particularly as this is a benefit -- readers will find the tone is a tad fluffy, to the point of being quite icky syrupy in places, so fair warning, eh?

This is an interesting and well-written pamphlet and makes me glad I don't drink the stuff.

THE RAIDS: THE TRUTH

Heard any pricks running round saying the cops have closed GA down? As you're

reading this, note these know-nothing know-alls for when they spout the same in future.

Since the start of March, Hampshire Special Branch have raided 17 different places

looking for 'evidence' to further frame ALF Press Officer Robin Webb [see GA 37-38].

Eight raids were against green anarchists and four of us are on police bail for conspiracy

The raids were 'fishing expeditions' now ARNI's expanded into the Green movement.

The MoD raid on Greenpeace is part of the same databasing process. We accept if the

State can't get at underground activists, they go for softer targets trying to bury them.

Don't be deterred -- we're no hostages! We lost our exchange list to the cops and

destroyed our subs list before they got that -- reminders on both appreciated, but note

ARNI have increased mail hassle too, two whole columns 'disappearing' via

to incite arson, the BS they use to silence the truth about the State and resistance to it.

Yep, that's the line Searchlight's peddling to journalists interested in David Icke [see GA36-37]. Supposedly those who exposed Icke and excluded him from the Green Party last year are "Nazi infiltrators" while Searchlight -- ignoring Icke as he grew into a bigger revisionist than David Irving -- wasn't consenting to anti-semitism by its long

SAD LIL' STEWART

We're glad to report GA37's editorial so upset Stewart 'Poland' Home that he churned out not one but two black propaganda leaflets in reaction! Certainly goes to show he can't take what he dishes out and such a fuss over acknowledgements from over a decade ago shows Home has much to hide -- but you'll hear more of all that in future.

This cowardly creep hadn't the guts to put his lies to our face but the witlessness and political illiteracy about GA and the far Right shown in his Green & Brown Anarchist show he's not up to it. He pretends "GA intend to achieve a 95% reduction in the human population [by] Green Death Camps", just a rehash of smears thrown at Earth First! and Greens in general by the State half a decade ago and now past their sell-by date with all except Searchlight. When we discussed populaton in GA28, we argued current population levels aren't a problem but if they were, women's control over their own fertility would sort it -- well eco-fascist, eh?

Home's If Paul Rogers of Oxford Green Anarchist (sic) has broken with Richard Hunt, why does he still use Hunt's ideas? echoes Alternative Green's egocentric whine -- as if Hunt invented primitivism! -- and laughably argues we're fascists as GA sell an anti-tax poster done by Hunt at the height of the anti-Poll Tax wave, years before we broke with Hunt when his ideas took a reactionary turn during the Gulf War. Following this 'logic', all syndicalists are fascists (as opposed to anarchists, as Home stupidly believes) just because Mussolini used syndicalist ideas as a basis for fascism!

Through these anonymous leaflets, sad self-publicist Home has shown himself up to those he plays celeb -- his circle of journos, publishers and fans -- as cowardly, humourless, ill-informed, superficial and empty. The willingness of so many to take our side (unsolicited!) has shown Home how hated he is outside that small circle - and how noone's taking his shit no more, shit that leads nowhere. That won't stop him shovelling more -- but it might as well be straight down the pan now we all know what it smells
